

“Our lives begin to end the day we become silent about things that matter.”

- Dr. Martin Luther King -

We the undersigned are vehemently opposed to the existing antennas presently on our water tower, as well as the proposed new equipment to be placed thereon, although not opposed in theory to the police equipment (even though we do not believe this will serve the Bayville residents as well as some may think), we believe Motorola should find a more desirable location.

We believe that the deed of the land that houses the Water Tower was violated, and to use the Village’s own words (Local Law Number 2002-8 Section 2), “The Village finds that the Wireless Telecommunications Facilities may pose significant concerns to the health, safety, public welfare, historic character, aesthetic qualities and environment of the Village and its inhabitants.”

We believe our children’s (as well as our own) health and welfare is being ignored by the location of the tower directly across the street from our elementary schools and on top of our water supply. We feel it will be very difficult to sell our houses when potential buyers visit the schools. In short, we want the situation corrected as soon as possible- at best to get all cell phone antennas out of Bayville. At the very least, removed and placed in a more suitable location.
